Code No. LIT-1900686
Issued January 30, 2013

The Bluetooth Commissioning Converter (FX-BTCVT) provides a temporary Bluetooth connection between FX-PC Series Controllers and the laptop computer used to commission them. It allows technicians to commission and service the controllers over a wireless connection (Figure 1).

The FX-BTCVT Bluetooth Commissioning Converter provides communication from the BACnet® Master-Slave/Token-Passing (MS/TP) Field Controller (FC) Bus or the Sensor/Actuator (SA) Bus to a Bluetooth-enabled computer running the FX-PCT software. Any FX-PC controller on an FC Bus can be commissioned by connecting to any other FX-PC controller, any NS Series Sensor, or any FX-PCX connected to any FX-PC controller on the bus.

The 2.4 GHz Bluetooth connection allows for you to be up to 10 m (33 ft) away while you commission the controller with a laptop computer and the FX-PCT software.

Refer to the *FX-PC Series Programmable Controllers and Related Products Product Bulletin (LIT-12011657)* for product application details.

Features

- Bluetooth wireless communication provides a secure and reliable untethered connection between the laptop and the FX-PC controllers.
- Standard connection jacks on both the NS Series Sensors and FX-PC controllers provide multiple connection points to the system.

- The Bluetooth Commissioning Converter allows online access to controllers while the technician is using the Bluetooth-enabled laptop.
- Standard Bluetooth technology allows you to use a Bluetooth-enabled laptop or any laptop with a commercial off-the-shelf Bluetooth adapter.

If the product fails to operate within its specifications, replace the product. For a replacement product, contact the nearest Johnson Controls® representative.
